About me:

I am a 25-year-old student living in Zadar. I was born in Stuttgart, Germany, but since 1998 I have been living in Zadar. Currently, I am studying German language and Pedagogy at the University of Zadar.

In age of 18 I was diagnosed with MS (multiple sclerosis). Multiple sclerosis is one of the most common long-term conditions affecting the central nervous system (brain and spinal cord) and the main cause of non-traumatic disability in young adults.

The motivation to help and care about the rights led me to be part of the European multiple sclerosis platform and now to be a member of the EPF youth group. The patient advocacy makes me happy and it helps me to proceed in my personal life goals.

I am proud to be part of the EPF youth group 😊
